

Evaluating Investments in Health Care Systems

By Alessandro Scaletti

Springer-Verlag GmbH Mrz 2014, 2014. Taschenbuch. Book Condition: Neu. 23.5x15.5x cm. Neuware - This book focuses on the innovative and more critical management approach adopted in the PA (Public Administration) in order to identify and describe the main models and instruments to economically evaluate the decision making process in accordance to the specific conditions such as efficiency, effectiveness, cost and equity. The manuscript pays special attention to this sector by identifying, investigating and applying the main evaluation models (logic and methods) of the decision making process, in particular in terms of investment decisions. In the recent decades, with reference to PA, several managerial approaches have been developed from a business management perspective. These managerial approaches differ in terms of variables analyzed, such as the role of governance or the specific logics and mechanisms applied, but all of them have a common goal, which is the improvement of efficiency, effectiveness, economic and equitable decision making and operations in the PA. This book investigates the different mentioned frameworks adopting a wider and integrated analysis perspective on the evaluation of investments in the health care system. 62 pp. Englisch.

Reviews

Thorough information for pdf fans. It really is rally interesting through looking at time. I am easily will get a satisfaction of studying a published pdf.

-- **Autumn Bahringer**

The most effective ebook i possibly go through. I am quite late in start reading this one, but better then never. Its been designed in an extremely basic way and it is just after i finished reading this ebook by which basically transformed me, modify the way i believe.
