## ***Reviews***

*This pdf is definitely not easy to get started on studying but quite entertaining to read through. I am quite late in start reading this one, but better then never. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

Excerpt: . . . and over-run in weight of castings, it is necessary to add a percentage to the net calculated weight varying from 5 percent in the case of large castings to 10 percent in the case of small pieces with numerous fillets. Table VIII. --Unit Weights of Substances most commonly used in Machinery Estimating Detail Sheets In Fig. 83 is given an example of a convenient form of sheet for recording the details of an estimate. Its use practically compels a certain amount of system in taking off the quantities; so that all plates, all loam castings, etc. , will be listed together and cost computed at the proper rate. By preparing the material-estimate in this methodical manner, and by checking-off each piece as listed by a red mark on the print, no serious omissions of items should take place. The same form may be used for making the estimate of direct labor required; and the totals may then be transferred to the Estimate Summary Sheet (Fig. 81) for addition of Indirect Costs, etc. SEC. III. STRUCTURAL STEEL ESTIMATING A Structural Steel Estimating Method General The method of taking off structural steel material outlined below is one which, with slight modifications, is quite generally used in estimating offices throughout the country. It is submitted, more particularly, as an aid to engineers in other than structural steel offices who may have occasion to make or to check estimates on work of this character. It has been the...
